

- mitochondrial membrane
- organophosphate biosynthetic process
- protein modification by small protein conjugation or re
- cellular response to starvation
- carbohydrate derivative biosynthetic process
- vacuolar membrane
- regulation of autophagy
- lipid transport
- intracellular signaling cassette
- mitochondrial matrix
- mTOR signaling pathway
- Death Receptor Signaling
- intraciliary transport particle A
- mitochondrial RNA metabolic process
- Golgi apparatus subcompartment
- Chemical carcinogenesis - reactive oxygen species
- Golgi membrane
- lipid homeostasis
- perinuclear region of cytoplasm
- Golgi vesicle transport
