

- transcription coregulator activity
- extracellular matrix
- transcription regulator complex
- transcription factor binding
- neuron projection development
- centrosome
- ribonucleoprotein granule
- chromatin binding
- regulation of cytoskeleton organization
- regulation of nervous system development
- supramolecular fiber organization
- Transcriptional misregulation in cancer
- cell-cell adhesion
- transferase complex, transferring phosphorus-contair
- mitotic cell cycle
- chromatin remodeling
- mRNA metabolic process
- response to ionizing radiation
- growth
- regulation of cell junction assembly
