

Top Nonredundant Enriched Pathways (BH < 0.05)

Heterotrimeric G-protein signaling pathway-Gi alpha and Gs alpha mediated pathway

Progesterone-mediated oocyte maturation

Sphingolipid signaling pathway

Nucleocytoplasmic transport

Chemical carcinogenesis – receptor activation

Transport of small molecules

Organelle biogenesis and maintenance

CCKR signaling map

mTOR signaling pathway

Insulin signaling pathway

Fluid shear stress and atherosclerosis

Autophagy – animal

Axon guidance

Alzheimer disease

Metabolism

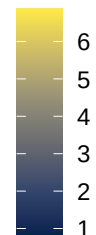

Human immunodeficiency virus 1 infection

Immune System

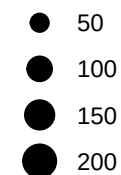

Disease

Signal Transduction

Post-translational protein modification
